

AFTER SALES SERVICE

As part of our Total Quality Assurance programme (BS EN ISO 9002), all the records covering the manufacture and installation of your windows and doors are stored on a database. This means we can source and replace for you any component, normally within hours of you contacting us. Speedy, reliable service over many years has built us an enviable reputation, and results in a large proportion of work coming from personal recommendations and further orders from established customers.

The Original Box Sash Window Company
