

DRAUGHT EXCLUSION

Exclusively made by The Original Box Sash Window Company in natural or colour-coded timber, SASHSEAL™ blocks draughts and damp air from outside, and stops noise and dust penetration.

The combination of specific control strips is fitted by our experts quickly and effectively. SASHSEAL™ has the added benefit of assisting the sashes to slide more easily than before. We always also fit new cords and adjust the weights.

The illustrations below show typical character windows and doors where our SASHSEAL™ has been used, maintaining the original appearance.

Note: "SASHSEAL™" is the Registered Trade Mark of The Original Box Sash Window Co. For clarity, the SASHSEAL's™ have been highlighted in red on the illustration (left).
