

COMPLYING WITH THE GOVERNMENT'S NEW INSULATION REGULATIONS

Replacement windows and doors must meet more exacting standards, helping you save on heating. The Governments' new glazing regulations came into force April 2002.

At The Original Box Sash Window Company you find the perfect blend of lasting beauty of traditional timber glazing bars and mouldings, and state of the art technology that meets the new, stringent regulations.

With our windows and doors you can therefore be confident of a unique combination of original good looks and the full benefits of modern manufacturing and installation methods.
