

## NOISE REDUCTION

---

*The improvement in the reduction of outside noise is quite dramatic when Original Box Sash Window Co. windows and doors are installed. Our unique combination of control strips, "SASHSEAL™" and our vibration absorbent sealed glass units block all routes by which noise travels, making your home a quiet place. On installation, any room becomes so much more pleasant and comfortable, improving enormously the quality of its use.*

*If your windows and doors do not need replacing, you can still get the particular benefits of SASHSEAL™ by having them fitted to your existing ones.*
